Stratevarius

A Virtual Accelerator for Technology Startups

All good Startup Executives have skills gaps, but the truly great ones embrace the fact that they need lots of help along the way. Stratevarius is the best place to search for advisors and mentors that can help grow and mature your business, starting NOW! Get beyond the venture capitalists & angels, and peer directly into THEIR rolodexes. Tap the same consultants that they hire, but without the baggage of taking on another boss or giving up equity. With your help, Stratevarius is chasing the strategists-for-hire, and mentors-for-good, who have enabled startup success in the past... and elevating the ones who stand ready to help do the same for your business in the future. Find them, track them, rate them, contact them, get their jet fuel into your startup engine.

In the past, searching for Advisors, Mentors, & Consultants has been extremely time consuming, & often resulted in a bad fit. Yet Startups can't really afford to go down a rabbit hole or get off-track. Stratevarius was founded precisely to capture the successes & failures of other startup leaders who came before you - to help bottle the learning and experiences they've had with a cacophony of consultants and advisors that exist out in the field. We help you combine the anecdotes & networking you are already doing with hard data & the insights from your peers. With Stratevarius as your guide, and the right Partner by your side, the next stage of your Startup's growth can play like a symphony.
